

Call Routing and Handling

This section defines what happens once a call is answered, ensuring that it is properly managed and directed within the system.

- **Routing to Agents**

Determines how calls are assigned to available agents, ensuring efficient distribution based on availability or predefined rules.

- **IVR Integration (if applicable)**

Allows calls to pass through an Interactive Voice Response system, where callers can select options before being connected to an agent.

- **Voicemail Handling**

Defines how voicemail interactions are managed, including detection, recording, or appropriate follow-up actions.

- **Call Transfer Rules**

Establishes how and when calls can be transferred between agents or departments, ensuring proper handling of customer needs.
